## Sacramento Valley and Central Sierra Region

General Deer Hunting Information For

### **ZONE D-3**

(Includes Additional Hunts G-7, G-12, J-8, J-9, and J16)

#### **GENERAL INFORMATION FOR DEER HUNT ZONE**

This information sheet has been prepared to assist deer hunters applying for, or planning to hunt in, Zone D-3 located in portions of Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter and Yuba counties. The following information should be useful to hunters for archery and general seasons as well as any "additional hunts" within this geographic area. For more specific information or additional questions regarding this area, contact the Sacramento Valley and Central Sierra Region Office, 1701 Nimbus Road, Rancho Cordova, CA 95670 (916-358-2900).

#### **REGULATIONS**

Laws and regulations are designed to conserve wildlife and to provide for an equitable distribution of game mammals. The hunter who knows the laws and regulations can enjoy the hunting experience more. All hunters should read and be familiar with the current hunting regulations available online at:

<http://www.fgc.ca.gov/html/regs.html>

The 2005 deer hunting regulations specific for Zone D-3 (archery and general season) and any additional hunts are at the end of this sheet. To hunt deer in Zone D-3, hunters must possess a Zone D3-5 deer tag. This tag is valid during the archery or general season using the appropriate method of take in either: Zone D-3, D-4 or D-5. Season dates may vary between these zones, so be sure to check the current regulations for the zone you plan to hunt.

Additionally, Archery Only #1 Tags (AO#1) and Archery Only #2 Tags (AO#2) are valid during the Zone D-3 archery or general season using archery equipment only.

Any additional deer hunts in Zone D-3 are listed in the Additional Deer Hunts section, below. Typically, tags for additional deer hunts are in high demand and distributed through the Department's Big Game Drawing held in June. To receive tags for many of these hunts, hunters must plan ahead and are encouraged to submit deer tag applications by late May. For information regarding deer tag application procedures and obtaining a deer tag for this area, see the Big Game Hunting Booklet, available on-line at: <http://www.dfg.ca.gov/licensing/biggame/biggamebook.html>

Successful hunters are reminded to immediately fill out both portions of the tag and permanently mark the date of kill; record the appropriate "D" zone where they killed their buck (Zone D-3, D-4 or D-5); attach the tag to the antlers, or ear if antlerless; have the tag validated and countersigned; and return the completed report card portion to the Department within 30 days of taking a deer.

### **LAND OWNERSHIP/PUBLIC LAND OPPORTUNITIES**

Zone D-3 contains a mixture of both public and private lands however most of the public land is in the eastern portion of the zone. Remember you must obtain and have in your possession written permission to hunt on private property. Hunter trespass laws are strictly enforced. Public lands within the zone are administered by the Plumas and Tahoe National Forests (USFS). For information regarding these lands contact the following:

#### **USFS Offices:**

Plumas National Forest, 159 Lawrence Street, Quincy, CA 95971-6025 (530-283-2050)

Tahoe National Forest, 631 Coyote St., Nevada City CA 95959 (530-265-4531)

There are some public lands administered by the Bureau of Land Management (BLM) in the western portion of the zone, but access is extremely limited. Hunting is also allowed on Spenceville and Daugherty Hill Wildlife Areas, administered by the Department of Fish and Game. For more information and maps of these areas contact the Sacramento Valley and Central Sierra Region Office, 1701 Nimbus Road, Rancho Cordova, CA 95670 (916-358-2900).

In Zone D-3 and other zones throughout California, additional deer hunting opportunities may exist on private property licensed through the Department's Private Lands Management Program (PLM). For more information on the PLM and to obtain a list of participating ranches, go to the following link:

<http://www.dfg.ca.gov/hunting/deer/plm.html>

### **MAPS**

For general maps detailing individual zone or additional deer hunt boundaries, go to the following link:

[http://www.dfg.ca.gov/hunting/deer/deer\\_maps.html](http://www.dfg.ca.gov/hunting/deer/deer_maps.html)

The most comprehensive maps of the area are the Plumas and Tahoe National Forest maps. USFS maps are available at all USFS offices or you can contact the USFS Pacific Southwest Regional Office at: 1323 Club Drive, Vallejo, CA 94592 (707-562-8737).

BLM surface management maps may also be useful. You can purchase these maps at BLM district offices or you can contact the BLM at 2800 Cottage Way, Suite W-1834, Sacramento, CA 95825; (916-978-4400).

U.S. Geological Survey (USGS) topographic maps, are very helpful, especially for topographic features that are not displayed on USFS or BLM maps. USGS maps may be available from sporting goods, backpacking or engineering stores or you can contact the USGS directly at: Rocky Mountain Mapping Center, Branch of Information Services, Box 25286, Denver, CO 80225 (888-ASK-USGS).

### **ACCESS/MAJOR ROADS**

Major highways include Highway 70 on the north, Highway 80 on the south, Highway 20 and Highway 49. Access to the Bullards Bar Reservoir area is via Highway 49 or, from Marysville, via Highway 20 to Marysville Road.

### **WEATHER CONDITIONS/TRAVEL TIPS**

The weather in this zone can be highly variable, so BE PREPARED. The weather is usually quite hot and dry during archery and early general season, but early storms are not uncommon. The chance for significant snowfall increases throughout the season, but heavy rains can make many roads very difficult, if not impossible, to travel. You should be prepared with appropriate clothing and equipment for a variety of weather conditions.

Zone D-3 covers a large geographic area. The terrain can be very steep and rugged and vegetation can be extremely dense. As you should do in all remote areas, hunters are urged to bring a shovel, a good spare tire, extra water, etc. Use care with any off-road vehicle and check with the BLM or USFS for rules and regulations regarding vehicle and travel restrictions in the area. Horses can be useful in some portions of D-3. However, remember that it may be necessary to carry supplemental horse feed into the

back country. Contact the local USFS and/or BLM office for more information regarding forage conditions for livestock.

### **CAMPING**

There are several USFS campgrounds within the hunt zone and these are shown on USFS maps. Informal camping is allowed on both USFS and BLM lands, but campfire permits are required. Permits may be obtained from any USFS, BLM or California Department of Forestry (CDF) office. During fire season, special regulations may apply and it is best to contact the local USFS, BLM or CDF office for the latest information.

Please, DO NOT camp or hunt for prolonged periods near water sources important to wildlife and livestock. Remaining for over 30 minutes and within 200 yards of an artificial water source including guzzlers or horizontal wells on public lands within California is a Fish and Game violation (Title 14, Section 730). You can pack water, wildlife can't.

### **HARVEST INFORMATION**

Information on deer harvest for this area is available in tables contained in the annual Deer Kill Reports available on-line at: <http://www.dfg.ca.gov/hunting/deer/deerhunt.html> The most useful tables for the purposes of planning or applying for hunts in this area are Tables 1b (Harvest and Success Information), 2a (Antler Class Information) and 10b (Drawing Statistics).

### **HERD CONDITIONS AND HABITATS**

The deer population in Zone D-3 is considered stable to declining, yet considerably below levels seen in the late 1960's and 1970's. As with most deer herds in California and other western states, the long-term population trend has been on a steady decline since the 1960's and 1970's. These long-term declines have been due to land management practices that have precluded fire, resulting in changes toward more mature and less diverse habitats, and reduced quality and quantity of deer habitats. Short-term fluctuations in deer populations are usually attributed to weather events that affect forage production.

The subspecies of deer inhabiting Zone D-3 include both Columbian black-tailed deer and California mule deer. The deer are generally considered migratory however resident deer occur at lower elevations. Deer in this area move to higher elevations in late spring and will remain there until the first heavy fall storms force them down below the snow line. This downward movement often occurs during the hunting season, so hunters should be prepared to move to lower areas later in the season after stormy weather.

The vegetation is highly varied throughout Zone D-3 ranging from oak-woodland, mixed and montane chaparral, hardwood, hardwood-conifer, aspen and dense conifer to alpine habitats. Generally speaking, deer populations in this area respond favorably to vegetation disturbances that enhance brush species (wildfire and timber harvesting). Brush stands comprised of buckbrush, deerbrush and bitter cherry are good areas to hunt. Riparian areas (areas along watercourses), recently burned areas or clear cuts that have re-sprouted with brush are good areas to hunt. Areas where oaks are producing acorns may also attract deer. Typically, lower densities of deer are observed in the more densely forested areas or in older, more decadent brushlands.

### **HUNTING TIPS AND WHERE TO LOOK FOR DEER**

Successful hunters often spend a considerable amount of time scouting pre-season, locating individual or groups of deer, recently used deer trails, and feeding and bedding areas. You may not see many deer from the roads in this area and generally the more successful hunters do more hiking to locate deer. Binoculars and/or spotting scopes can be very helpful for locating and identifying deer at greater distances. In general, attempt to hunt areas that are away from other activities such as concentrations of hunters, vehicles, and/or livestock.

Historically, some of the more popular and productive deer hunting areas in Zone D-3 include:

**Butte County:** Feather Falls area: This is largely winter range and hunting is best during the latter portion of the season. Specific areas include: Fields Ridge, southeast of Feather Falls; Sunset Hill, Camp 18 and

Watkins Ridge.

Brush Creek area: This is largely winter range and hunting is best during the latter portion of the season. Specific areas include: Merrimac and Coyote Gap.

Mooreville Ridge Road/Sly Creek Reservoir: Migratory deer are generally present in mid-October.

**Nevada County:** Specific areas include: Bowman Lake, Grouse Ridge and Red Mountain. Migratory deer can still be found at these high elevations early to mid-season.

**Plumas County:** La Porte area: Access is via the La Porte Road from Marysville. Hunting has been poor for several years, but areas around Little Grass Valley Reservoir, Camel Peak, Stag Point and Onion Valley have historically been better areas.

Bucks Lake area: Access is via the Quincy-Oroville Highway. Specific areas include the area between Bucks Lake and the Middle Fork of the Feather River, Bear Creek and Willow Creek.

Eureka Ridge area: Access is from Highway 70 at Sloat and Highway 89 at Graeagle. Specific areas include White Cap and Big Hill.

**Sierra County:** Haypress Meadows, Jackson Meadows Reservoir: Access is via the Jackson Meadows Highway from Highway 89. Best hunting in this area is early in the season.

Lakes Basin, Sierra Buttes: Access is via the Gold Lake Road from Highways 89 and 49. In good years, hunting success is favorable throughout the season. Late in the season, deer migrate to the west down Pig and Hog Canyons.

**Yuba County:** Challenge/Peterson Ridge Road/Pike County Peak Lookout area: Migratory deer are generally present in mid-October. Several thousand acres of USFS and private timber company land east of Oregon Hill Road and west of Bullards Bar Reservoir.

North of Bullards Bar Reservoir: Migratory deer are generally present in mid-October. Several thousand acres of USFS and private timber company land mixed with a few private ranches. Specific areas include: Strawberry Valley/Slate Creek (south of La Porte Road), Pendola Road, Garden Valley Road, McClain Roads. Access is from Highway 49 near Camptonville.

Bullards Bar Reservoir: Migratory deer are generally present in mid-October. Boats can be launched from ramps located along Marysville Road. Best areas to hunt are the black oak groves along the north arm of the lake.

Spenceville Wildlife Area: Resident deer are present throughout the year. Migratory deer generally do not arrive until late October. Access from Wheatland is via Spenceville Road to Camp Far West Road to Long Ravine Road. Access from Marysville/Grass Valley is via Highway 20 to Smartville Road.

Daugherty Hill Wildlife Area: Resident deer are present throughout the year. Migratory deer generally do not arrive until late October. Access from Marysville/Grass Valley is via Highway 20 to Marysville Road to the parking lot on Dolan Harding Road. Local camping facilities are available at the Collins Lake Recreation Area (530-692-1600).
